Detailed Action

The art unit designated for this application has changed. Applicant(s) are hereby informed that future correspondence should be directed to Art Unit 1631.

Note the attached Notice of Draftsperson's Patent Drawing Review. Applicants are hereby notified that the required timing for the correction of drawings has changed. See the last 6 lines on the sheet which is attached entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Applicants are required to submit drawing corrections within the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-9, drawn to methods of identifying transcribed region of a genome, classified in Class 702, subclass 19.
- II. Claims 10-14, drawn to computer software product, classified in Class 128, subclass 920.

The inventions are independent/distinct, each from the other because of the following reasons:

The inventions of Groups I and II are independent distinct inventions because they are directed to distinct subject matter regarding the critical limitations therein. For Group 1, the critical feature is a process of identifying transcribed region of

a genome; for Group II, however, the critical feature is computer software product. The inventions of groups I and II have different modes of operation, different functions and different effects. Consequently, these inventions have acquired a separate status in the art as a separate subject for inventive effect and are usually published separately. The search for each of the above inventions is not co-extensive particularly with regard to the literature search.

Because these inventions are independent/distinct for the reasons given above and have acquired a separate status in the art and thus are usually published separately in the literature because of their recognized divergent subject matter, there would be undue search burden if they were examined together. Therefore, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the
